-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on 2/19/2004 is in compliance and has been considered by the examiner.

Claim Objections

Claim 6 starts with "The method according to claim 2" which should read "The process according to claim 2". Appropriate correction is required.

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1-8 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by U.S. Patent Publication 2004/0040659 to Hasper.
2. Referring to claims 1, 2, 7 and 8, Hasper shows a process adapted to heat and cool a substrate comprising the steps of: forming a first batch of semiconductor material, and loading the first batch into a carrier, transferring the first batch to a heating mechanism (Paragraphs 0014-0017), forming a second batch of semiconductor material, and loading the second batch into the carrier, while heating the first batch positioned within the heating mechanism (ending of Paragraph 0017); transferring the first batch between a position proximate the heating mechanism and a position proximate the coolable member, cooling the first batch positioned

Art Unit: 2125

proximate within a cooling mechanism (Paragraph 0024); and while the first batch completes the process, transferring the second batch to the heating mechanism and pausing further operation of the second batch while inspecting the first batch to reduce the idle time of the process (These features are shown in paragraph 0017 and paragraph 0023).

3. Referring to claims 3-6, Hasper shows determining if the inspection is satisfactory or unsatisfactory and determining when to resume operation based upon the result of the inspection (paragraph 0025).
